

Tipping Bucket Rain Gauge with Bounce-Free Reed Contact

- **Parameters measured**
Rain/precipitation quantity
- **Measurement technology**
Tipping bucket with bounce-free reed contact (normally closed)
- **Product highlights**
Resolution can be switched from 0.2 to 0.5 with reduction ring, connectable to any WS-sensor without precipitation measurement
- **Interfaces**
Impulse output (reed contact)
- **Article number**
8353.10

Tipping bucket rain gauge with bounce-free reed contact

| General | |
|-----------------|----------------------|
| Dimensions | Ø165mm, height 285mm |
| Connection type | Open cable ends |
| Collecting area | 200cm ² |
| Weight | 930g |
| Mounting type | On mast, Ø 60-76mm |

Precipitation

Technical Data

Rain Gauge WTB100

| | |
|-------------------|---------|
| Accuracy | ±2% |
| Resolution | 0.2 |
| Maximum intensity | 144mm/h |

| Precipitation (with reduction ring) | |
|-------------------------------------|---------|
| Accuracy | ±2% |
| Resolution | 0.5 |
| Maximum intensity | 360mm/h |
